PROFESSIONAL SUMMARY

Detail-oriented Software QA Tester with 5 years' experience in end-to-end testing of web, mobile, and ERP platforms. Skilled in functional, regression, UI/UX, and integration testing (REST APIs, Google Workspace), designing/executing test cases, tracking bugs, ensuring data integrity. Experienced in validating complex workflows, authentication flows, and multilingual support while collaborating with developers and product managers to improve product quality through structured QA reporting and smooth deployments

PROFESSIONAL EXPERIENCE

Quality assurance engineer (Team Lead)

Cosella - Thelix Holdings

07/2026 – Present

Dallas, united states

- Led early-stage QA across a five-app platform (marketing, team, individual, desktop coaching, admin).
- Reviewed the master PRD against product and stakeholder requirements to confirm intended behaviour before build.
- Produced an automation test suite — 66-feature inventory plus 90+ test cases mapped to automatable coverage.
- Conducted exploratory testing across core flows and logged structured defect reports.
- Validated prototype behavior (persistence, routing, plan separation, validation) and embedded known defects as regression cases.

Quality Assurance engineer (Team Lead)

Credit Veto - Thelix Holdings

03/2026 – Present

Dallas, United States

- Owned end-to-end QA across a Flutter mobile app and a B2B partner platform (Scorely, Marketplace, Invoicing, Payroll).
- Authored 90+ structured defect reports covering auth, payments, KYC/BVN, credit scoring, rewards, and virtual accounts.
- Structured and executed 500+ test cases across 13 partner modules (positive, negative, and edge scenarios).
- Ran regression, smoke, and retest cycles, validating fixes and re-logging regressions before release sign-off.
- Managed the defect lifecycle in Command Hub and authored feature-verification and PM-style tickets with acceptance criteria.

Quality assurance engineer (Team Lead)

Lightforth - Thelix Holdings
modules—Auto

02/2026 – Present

Dallas, Texas

- Delivered QA across core AI modules — Auto Apply, Interview Prep, Resume Builder, KYC, and Copilot.
- Documented 50+ structured bug reports with clear reproduction steps and expected-vs-actual results.
- Built and maintained a Cypress E2E automation framework (TypeScript, Page Object Model, CI/CD).
- Ran sanity, regression, and exploratory testing to keep the product release-ready.
- Authored a 100+ test-case suite from the PRD and converted bug descriptions into structured reports and feature requests.

Software QA Tester

Descasio

09/2025 – 08/2026

Lagos, Nigeria

- Performed end-to-end testing of Plug IQ, a no-code automation tool, covering workflows, apps, and business processes like leave requests, expense claims, and authority-to-travel forms.
- Tested Workflow Designer, UI Editor, and Workflow Builder for accurate screen rendering, node linking, user roles, task transitions, and action triggers.

- Conducted functional, regression, and UI/UX testing across modules and validated third-party integrations (Google Workspace, REST APIs, Docusign, SendGrid, databases, Paystack) for data accuracy and automation reliability.
- Identified 500+ bugs via Linear, authored 1000+ test cases, collaborated with developers/product managers to prioritize issues, validate deployments, and ensure production stability
- Prepared QA reports, supported UAT, and ensured smooth rollout of client-specific configurations and new workflow feature
- Conducted end-to-end testing of Luna AI in Plug IQ, validating automated workflows, chat-based process building, and Workflow Designer/UI Editor outputs for apps like leave requests, expense claims, and authority-to-travel forms.
- Verified Luna AI's integration with Google Workspace, Microsoft 365, REST APIs, ensuring accurate data capture, synchronization, and user visibility.

Software QA Tester

Medicare supply chain

01/2025 – 03/2026

Lagos, Nigeria

- Conduct end-to-end testing across multiple modules and Multilingual support to ensure product stability and seamless user experience.
- Perform extensive functional, regression, and UI/UX testing on both web and mobile platforms to validate features, identify inconsistencies, and improve interfaces.
- Test and validate the complete authentication flow for both business and personal user registration.
- Collaborate closely with developers and product owners to review bugs, track fixes, prioritize blockers, and ensure timely resolution of issues.
- Prepare detailed test reports, consolidate weekly QA updates, and communicate findings clearly to technical and non-technical stakeholders.
- Participate in quality reviews, provide feedback to improve feature performance, and ensure compliance with product requirements.
- Support UAT sessions, document newly discovered issues on Zentao, and ensure the production environment is stable through continuous regression checks.
- Developed and maintained over 2,000 detailed test cases to ensure comprehensive coverage of system features and workflows.

Software QA Tester

Agendifynow

04/2023 – 10/2024

- Tested core features like Agenda, task management, reminders, and calendar sync across android mobile platforms.
- Reported and tracked 50+ bugs via Jira, managing each from open to close with clear documentation.
- Performed functional and regression testing to ensure smooth user experience and reliable performance.
- Validated APIs and third-party integrations using Postman and Playwright.
- Collaborated in Agile sprints with developers and designers to ensure quality releases.
- Maintained structured test plans, test cases, and bug reports to support team efficiency.

Software QA Tester

Syncpro

09/2021 – 12/2022

- Conducted comprehensive manual testing of web-based ERP and workflow management systems, including ticketing, task assignment, and agent console features.
- Designed and executed detailed test cases to validate system functionality, usability, and performance across multiple modules.
- Identified, documented, and tracked software defects using Click up, ensuring timely resolution in collaboration with developers.
- Performed regression testing after feature updates and bug fixes to maintain system stability and prevent reoccurrence of issues.
- Verified SLA/OLA configurations and workflow processes to ensure compliance with operational standards.
- Tested end-to-end user flows from ticket creation to resolution to guarantee seamless user experience.
- Collaborated closely with product managers and developers during sprint cycles to clarify requirements and validate delivered features.

- Supported pre-release and post-release testing to ensure high-quality deployments in staging and production environments.

Software QA Tester

12/2020 – 09/2021

Finarium

- Conducted comprehensive functional, integration, and end-to-end testing of a Banking as-a-Service platform supporting multicurrency wallets, local and cross-border transactions (USD, GBP, EUR).
- Tested user and merchant onboarding processes, including KYC verification, secure dashboard access, and account management workflows.
- Performed API testing for merchant services, including transfers, balance inquiries, transaction history, and account data retrieval.
- Validated real-time currency conversion, internal transfers, and external payment systems to ensure accuracy and reliability.
- Tested Super Admin dashboard modules, including user management, transaction monitoring, KYC management, subscription handling, and funds reconciliation.
- Executed regression testing to maintain system stability after feature updates and releases.
- Identified, documented, and tracked defects with clear reproduction steps and supporting evidence.
- Developed and executed over 1,000 comprehensive test cases to ensure system reliability and quality
- Collaborated closely with developers, product managers, and stakeholders to resolve issues and improve product quality.
- Supported security, compliance, and data integrity testing in line with financial industry standards.
- Ensured seamless user and merchant experiences by validating end-to-end workflows from onboarding to transaction completion.

Software QA Tester

01/2020 – 12/2020

Loopfreight

- Prepared and maintained Active Version Documentation (AVD), tracking releases, environments, and deployment status.
- Conducted comprehensive functional testing of user onboarding, authentication, wallet integration, payments, notifications, and profile management features
- Performed end-to-end testing of delivery and ride-booking workflows, from registration to payment and service completion.
- Validated driver-side functionalities including live location tracking, delivery acceptance, waybill confirmation, earnings, and rewards management.
- Tested and verified admin dashboard features such as user management, role assignment, transport configuration, and applicant approvals.
- Evaluated financial and reporting modules, including commission splits, reconciliation, earnings reports, and dispute handling.
- Executed regression and integration testing across staging and production environments to ensure system stability.
- Designed and executed 700+ detailed test cases, contributing to improved system stability and reduced production defects.
- Identified, documented, and tracked defects while collaborating with developers to ensure timely resolution
- Assessed product readiness against acceptance criteria and provided formal QA sign-off for releases.
- Supported testing of in-progress modules and ensured continuous quality improvement across releases.

Software QA Tester

07/2019 – 12/2019

Natural studio

- Conducted comprehensive testing of video and photo recording features, including capture, playback, editing, filters, and export/share functions.
- Validated camera functionality (front/rear switching, zoom, focus) and ensured high-quality media output across devices.
- Performed performance and stress testing to detect crashes, frame drops, and memory.
- Executed compatibility testing across multiple devices, OS versions, and screen resolutions to ensure consistent functionality.

- Identified, documented, and tracked bugs related to audio/video quality, synchronization, and app crashes, collaborating with developers to ensure timely fixes.
- Conducted regression testing after updates to ensure existing features remained stable and reliable.
- Evaluated usability of editing tools, filters, and sharing workflows, providing feedback to improve user experience.
- Designed and executed 400+ detailed test cases, contributing to improved system stability and reduced production defects.
- Supported pre-release and post-release testing to guarantee smooth deployment and high-quality performance in production.

SKILLS AND TOOLS

Product and Test Management Tool

ClickUp, Jira, Linear, Trello, Microsoft Project, Google workspace, github, Notion, Command hub and zentao

Automation and API testing

Katalon studio, Playwright, Cypress and Postman.

Performance Testing

Jmeter

Programming languages and Technologies

Basic HTML, CSS, Java script.

Design Tools

Figma

Collaboration Tools

Slack, Teams, DingTalk, Discord and Miro

Testing Types

Functional testing, E2E testing, Exploratory testing, Integration testing, cross-browser testing, API testing, Performance testing, UI/UX testing, Mobile testing, Manual testing, Database testing, smoke testing, Usability testing, Automation testing

Technical Skills and Soft skills

Bug tracking and reporting, Google Suite, Excel, test case, API testing, manual testing and automation testing, Attention to Detail, Critical thinking, Bug tracking/reporting, Customer-centricity, Detail oriented, Communication, Fast Learner, Time Management, Problem Solving and Risk-Based Testing.
